EDUCATION

Cambridge Institute of Technology, Bangalore (2023-2027)

Bachelor's Degree in Engineering (Artificial Intelligence & Machine Learning), related to Computer Science and Engineering | **CGPA : 9.00**

EXPERIENCE

ISRO-Project Intern | Machine Learning | Oct 2025 – Present

Working on flood-monitoring research involving terrain, elevation, and geospatial datasets. Contributing to ML model development, preprocessing pipelines, and risk-pattern analysis under the guidance of ISRO scientists.

TECHNICAL EXPERIENCE

TubeTales – A Youtube Video Summarizer | [Code](#) | [Live](#)

Tech: Hugging Face Transformers, LLaMA 3, Groq, React.js, NLP

- Built a <5s summarization pipeline using LLaMA-3 + Groq, improving relevance through experimentation, prompt tuning, and error analysis.
- Designed an end-to-end ML workflow with iterative refinement using user feedback, enhancing consistency and output quality.

SusJobs – Fake Job Detector | [Code](#) | [Live](#)

Tech: Python, Naive Bayes, Flask, HTML/CSS/JS, CountVectorizer, NLTK, Gemini 2.5 Flash, NLP

- Developed an ML pipeline on 17K+ job listings, boosting F1-score by 25% through feature engineering, balanced sampling, and model comparison.
- Added LLM-based explanations and optimized preprocessing to improve interpretability, trust, and system efficiency.

Email Spam Detector | [Code](#) | [Live](#)

Tech: Python, Scikit-learn, TF-IDF, Streamlit

- Achieved 95%+ accuracy using TF-IDF + statistical modeling, improving reliability through experiment-driven feature evaluation.
- Built a real-time Streamlit interface that classifies emails as spam/phishing or safe, enabling fast and clear user decisions.

TECHNICAL SKILLS

- **Programming Languages:** Java, C++, Python, JavaScript, C
- **ML & DS:** Scikit-learn, TensorFlow, Pandas, NumPy, Statistical Modeling, Experiments, Feature Engineering
- **NLP:** Transformers, NLTK, LLMs (Groq, Gemini, LLaMA), Text Processing
- **Web & Backend & Devops:** FastAPI, Flask, REST APIs, Authentication, Git, GitHub, Vercel, Render
- **Data Tools:** Matplotlib, Seaborn, JSON/CSV, Data Cleaning, Visualization
